

JUAN AKBAR INDRIAN

FULLSTACK DEVELOPER

Bandung, Indonesia | juanindrian02@gmail.com

SUMMARY

Computer Engineering graduate with hands-on experience in freelance and professional software development since 2020. Skilled as a Fullstack and Backend Developer, with a strong passion for learning new technologies. Known for being adaptable, fast-learning, and solution-oriented. Enthusiastic about both coding and outdoor challenges like mountain hiking.

PROFESSIONAL EXPERIENCE

Fullstack Developer

Sept 2025 - Present

PT. Fan Integrasi – Bekasi

- Developed InMail application with disposition features and Employee Apps integration as Backend-focused Fullstack Developer.
- Built backend using Express.js, Drizzle ORM, PostgreSQL, and Docker for secure APIs, real-time notifications, and scalable deployment.
- Ensured seamless workflow, data management, and containerized infrastructure.

Backend Developer

Mar 2024 - Aug 2025

PT. Mulya Kencana Metalindo – Bandung

- Designed and developed backend services and APIs to support internal systems.
- Managed server infrastructure using Windows Server and containerized environments with Docker.
- Contributed to the development of Proline Solo, a custom project management application tailored for internal operations.

Fullstack Developer

Oct 2023 - Mar 2024

PT. Elda Sarana Informatika – Bandung

- Developed APIs using Laravel and built dynamic admin dashboards for internal systems.
- Occasionally contributed to mobile app development using Flutter.
- Collaborated closely with cross-functional teams to deliver integrated web and mobile solutions.

Freelance Fullstack Web Developer

Jan 2020 - Present

Remote / Various Clients

- Built custom web apps using Laravel, MySQL, and React.js.
- Delivered a school system (MAS Al-Bidayah, Bandung) and a POS app for a café in Aceh.
- Handled full development from planning to deployment.

Fullstack Developer Intern

Mar 2023 - Jun 2023

PT. Haleyora Power Region – Bandung

- Developed a fullstack web application for K3 assessment and survey.
- Used Laravel for backend services and built responsive front-end interfaces.
- Collaborated with internal teams to align system features with operational needs.

System & Database Administrator Intern

Jan 2019 - Jun 2019

Bappeda (Regional Planning Agency) – Langsa, Aceh

- Assisted in managing internal systems and maintaining server infrastructure.
- Performed database tasks like backup, cleanup, and optimization.
- Supported routine system maintenance and documentation.
- Helped ensure data accuracy and system reliability with the IT team.

EDUCATION

Associate Degree in Computer Engineering

2020 - 2023

Politeknik TEDC – Bandung

- Studied computer networking, Internet of Things (IoT), and system administration.
- Final Project: "Design and Development of a Smart Mirror Using Raspberry Pi 4 for Home Automation."

Vocational High School in Computer and Network Engineering

2017 - 2020

SMK Negeri 2 – Langsa, Aceh

- Focused on computer networks, basic programming, and IT infrastructure.
- Gained practical skills in network setup, troubleshooting, and hardware configuration.

SKILLS & TOOLS

- **Programming & Development:** Laravel, PHP, JavaScript, MySQL, React.js, Flutter.
- **Tools & Platforms :** Git, Docker, Windows Server, Firebase, Postman.
- **Other Skills :** RESTful API Design, System Administration, Deployment, UI/UX Collaboration

PROJECTS
